**GitHub Profile:** <https://github.com/collohdicey/>

I am inspired by creating great work with people who are as passionate as I am about building something awesome. I am looking to take on more work and to increase my skills. I've always been drawn to the overlap between design and development. My skills are broad: from UX to design, front end to back-end development, system maintenance, database development and maintenance. I enjoy each aspect, and I'm available for remote and physical work.

## EXPERIENCE

MAY 2020 – TO DATE

FULL STACK DEVELOPER, KIMACOM Ltd

Develop web applications and mobile applications, help in data recovery when there is an issue with the system, train users on how to use the system, Monitor and maintain the databases being used. Some of the projects worked on include:
